COVID-19 Open Datasets

❑ Data Limitations

- Data are scattered at many sources
- Data are not comparable, lack of standard
- Data are not permanent, may be available for a short time only
- Data are not rich in rich spatial information

Data Management
and Sharing Platform

❑ Analysis Limitations

- Analyses are not connected with data
- Analyses are not easily replicable
- Analytical tools are hard to maintain
- Computing environment are hard to set up
- Research cycle is time consuming if to start from scratch

Integrated Data
Analysis and Results
